🐞 My Hawaii Vacation

Category	Author
🐞 Malware	John Hammond

Challenge Prompt

Oh jeeeez... I was on Booking.com trying to reserve my Hawaii vacation.

Once I tried verifying my ID, suddenly I got all these emails saying that my password was changed for a ton of different websites!! What is happening!?!?

I had a `flag.txt` on my desktop, but that's probably not important...

Anyway, I still can't even finish booking my flight to Hawaii!! Here is the site I was on... can you get this thing to work!??!

❗ CAUTION

This is the `Malware` category, and as such, includes malware. Please be sure to analyze these files within an isolated virtual machine.
